## Transportation Investment Act of 2010

### Program Overview

The Transportation Investment Act (TIA) Referendum was passed by Georgia voters in the regions of Central Savannah River Area, Heart of Georgia - Altamaha and River Valley. These three regions will implement a one percent regional sales tax over a ten year period to fund transportation improvements. Georgia DOT is responsible for the management of the budget, schedule, execution and delivery of all Projects contained in the Approved Investment Lists. Georgia DOT is collaborating with local and state agencies to ensure timely delivery of TIA projects, with a structure that focuses on high-level project management, intergovernmental coordination, transparency and successful program delivery.

### Program Funding

Collection of TIA funds began on January 1, 2013. Funds are collected by the Georgia Department of Revenue (DoR). DoR will collect and enforce the special district transportation sales and use tax for the use and benefit of the Special District imposing the special district transportation sales and use tax. Georgia State Financing and Investment Commission (GSFIC) will disburse the proceeds of the special district transportation sales and use tax as soon as practicable after collection. GSFIC will transfer the 25% distributions for the local government allocations monthly. Funds for building projects were first distributed in early Spring 2013.

# What is the DBE Program?

- The goal of the DBE program is to level the playing field in USDOT contracting.
- In 1983, Congress enacted the first disadvantaged business enterprise (DBE) statutory provision.
- USDOT established a DBE goal encompassing small firms owned by individuals meeting social and economic eligibility standards.
- The Federal provision ensures that good faith efforts are made to expend **at least** 10% of federal highway and transit funds through the DBE program.
- Only the work of certified disadvantaged businesses are credited toward the DBE Goal.
- The USDOT DBE program is carried out by state and local transportation agencies under the rules and guidelines in the Code of Federal Regulations

# How the DBE Program Works

- GDOT's current DBE Goal is 15%.
- Contractor DBE Goals are assigned to federally funded projects, when subcontracting opportunities exist.
- A GDOT committee meets each month to set contract goals prior to advertising the project. Project specific goals may be less than or greater than the federal goal of 10%.
- Contract DBE goals must be narrowly tailored. Goals are calculated based on ready, willing, and able DBEs in comparison to ready, willing, and able non-DBE firms registered to work in the project's specific location.
- The DBE program *is not* a preference, set aside, or quota program.
